WHICH MAKES IT EASY TO MOUNT
THE WALL LAMPS ON MOST HOUSE
FRONTS AND SURFACES.

FAQ

WHY 2 OUTDOORS?

Because we love to keep it simple.
We believe the 2 outdoors - with their minimalistic design - is, what is needed to fulfill most needs in outdoor fixtures.

IS IT POSSIBLE TO GET A LED VERSION?

Yes... and even more importantly – you can replace the LED bulb yourself, if needed.

ARE THE OUTDOORS PROTECTED AGAINST WEATHER IMPACTS?

Yes - with triple protection.
The shades are made of sea-water resistant alu.
Next it is chromatised and finally we powder-coat with a strong powder for outdoor use.

WHAT MAKES THE WELCOME SO SPECIAL?

Besides the size and quality, the designer has refined and rounded the edges of the shade, which gives a soft and human look.
Finally, the multi E27 socket, guarantees the outdoors to be fit for future changes on the LED-market.

ARE THEY EASY TO INSTALL?

Yes.
All mounting parts are included in the box, where you also find a drilling template.

NEED

EMBACCO LIGHTING - founded back in 1994 - is a danish lighting company.
We have been working in lighting design since the very beginning.
The founder Lise Nørgaard is still today running the company.
In 2008 we launched our own lighting collection and the great outdoors.

Please note...

Welcome and Light U are separated from the electrical part,
meaning it is easy to refresh the shade with a new layer of paint.

Og så er de 2 udendørs danske...naturligvis.
